

Aloe Volume 53(1) 2017

### ***Haworthiopsis***

The Succulent Society of South Africa recently published a special edition of its journal. It offers a complete treatise on the genus *Haworthiopsis* authored by Sean Gildenhuys. The genus was recently established, when the Section Hexangulares in the genus *Haworthia* were placed in the genus *Haworthiopsis*. These plants have never before been treated as extensively, all taxa are illustrated with high quality photographs, mostly taken by the author. In addition there are three colour reproductions of exquisite paintings by the well known botanical artist, Gerhard Marx. It is a soft cover booklet in A4 format with 80 full colour pages. The name of the journal is ALOE, it deals mainly with the alooid genera such as Aloe, Haworthia and Gasteria.

It can be ordered from the Succulent Society at R150.00 per copy, airmail postage included. Please complete the Membership Application form and in the Comments Line write that you are ordering Aloe Journal 53(1).
